Greek (native) · English (fluent)

SUMMARY

Java software developer with ~5 years at Amdocs, building new functionality and fixing defects on live telecom order-management systems used by some of the world's largest operators. Owns issues from diagnosis through fix and verification, backed by SQL work on production data, REST/SOAP integrations and automated regression suites. Uses AI-assisted development daily: Cursor with MCP integrations wired to real systems and data sources, and critically reviews model output for subtle errors. Recently completed courses in Claude Code and coding agents, building AI agents, voice agents and workflow automations in n8n, and generative/agentic AI. Looking to build AI-powered products and developer tooling.

EXPERIENCE

Software Developer (Mid-Level) — Amdocs, Cyprus

September 2021 – Present · Order management for some of the world's largest telecom operators

- **Java development (primary):** Deliver new functionality across the ordering flow and fix defects that only appear once an operator is live; own work from diagnosis through fix and verification.
- **Domain depth:** Understand how an order moves through operator systems, its states and common failure points (stalls between systems, wrong routing, stuck states).
- **Data & SQL:** Write SQL Server queries against production data to trace record history, confirm fixes, reconcile discrepancies between systems and produce reports for non-technical departments; automated recurring hand-built reports.
- **Integration & testing:** Work with REST and SOAP APIs; build and maintain SOAP UI regression/integration suites.
- **Delivery automation (secondary):** Build and maintain Jenkins jobs and release scripts; take changes into production in scheduled windows (prepare, test, deploy, verify, record).
- **Live-system support (secondary):** Handle L2/L3 tickets from other departments, most traced to code and fixed directly; tracked end-to-end in Jira.
- **Environments:** Configure and monitor services on Windows Server, Linux and Red Hat OpenShift (RHOCP) / Kubernetes / containers across dev, test and production.
- **Team:** Wrote team procedures and documentation and trained new joiners. Promoted to mid-level after ~1.5 years.

SKILLS

Area	Detail
Development	Java · defect diagnosis and fixes · Git / Bitbucket · PowerShell
AI-assisted development	Cursor (daily) · MCP tool integrations to real systems and data · coding agents (Claude Code, course) · reviewing/evaluating LLM output against expected results
Agents & automation	Agent workflows, voice agents and automations in n8n (course) · generative & agentic AI concepts (course)
Data	SQL Server production queries · reconciliation · reporting · Excel
APIs & testing	REST · SOAP · SOAP UI regression/integration suites · acceptance-criteria checks
DevOps & systems	Jenkins · release scripts · Linux · Windows Server · OpenShift (RHOCP) · Kubernetes · Docker / containers
Process	Jira · root-cause analysis · documentation · training joiners

---

PROJECTS & STUDY

AI tools in daily work — Ongoing, own time. Use Cursor with MCP integrations wired to real systems and data sources on actual

work, not demos; spend time critically reading model output for subtle errors.

Ship collision alerts from a live AIS feed — Final-year project, Cyprus University of Technology. Ingested a live vessel-position feed, cleaned and re-sequenced dirty, late and out-of-order data, then detected potential collisions from course/speed and raised restricted-area alerts.

EDUCATION

BSc Computer Science and Engineering — Cyprus University of Technology, 2017 – 2021

National Service — Cyprus National Guard, 2015 – 2017

CERTIFICATIONS & COURSES

- **Certified Professional – DevOps Foundation (CP-DOF)** — Agile Testing Alliance, 2023
- **AI Coder: Complete Claude Code & Coding Agents** — Udemy (Ligency, Ed Donner), Oct 2026 · completed course, 16.5 hrs
- **AI Builder: Create Agents, Voice Agents & Automations in n8n** — Udemy (Ligency, Ed Donner), Sept 2026 · completed course, 14.5 hrs
- **AI Leader: Generative AI & Agentic AI for Leaders & Founders** — Udemy (Ed Donner, Ligency), Oct 2026 · completed course, 4 hrs

---

INTERESTS & DOMAIN KNOWLEDGE

- **Stock markets and trading:** Personal investing; follow macro and company news daily; self-study of trading-platform internals (MT4/MT5, FIX), personal study only.
- **Health and longevity:** Nutrition.
- **Cooking** and **travel**.
